ANDREA Rosin

"...It sets a unique standard." Lynn Harrell - cellist

Each block of ANDREA rosin is made by hand in the USA from a select blend of the highest quality ingredients by professional New York violinist Peter Bahng (Sang-Wook). Read the story of Peter's father Andrea Bang who is the inventor of the rosin and also a violinist. **You may remember that ANDREA rosin was made by Andrea Bang several years ago under the name Tartini (not to be confused with New Tartini which is a different product).**

Bought and used by professionals, this rosin is worth every penny for the sound that it draws from your instrument. Many professional musicians wouldn't be without this rosin, and if you try it you'll understand why. Just 3 - 4 swipes of your bow over the rosin is enough due to it's powerful formulation, meaning it's an economical rosin too.

'A Piacere' Rosin previously known as **Tartini Green** which was discontinued in 2004. Now relaunching in March 2011 as 'A Piacere'. 'A Piacere' has the exact same formula as the Tartini "Green," which provides the effortless bow control with even sound production. This rosin will get the most out of your instrument and add that extra something.

Solo Rosin: Gives a pure, clean and projecting sound that soloists love. This isn't 'marketing speak' - this stuff is seriously good. (Solo rosins were also known under the names Paganini for violin, David for viola, and Casals for cello).

"Even in a blind test comparing this with the previous versions, we were able to tell the difference very clearly. This new rosin is simply superb and will make a wonderful difference to your playing!" **Mark and Alison**
www.danceofdelight.co.uk

Orchestra Rosin: Gives a smoother sound that blends well in an orchestra. The sound is more controlled. **Orchestra rosin was previously known as Symphony rosin.** (Orchestra rosins were also known under the name Vitali for violin, Vienna for viola, and Toscanini for cello).

Partners: Joan Corder, Paul Corder & Barry Robinson Mallett

VAT REGISTRATION No. 840 4859 17

All Standard sized rosins come in the boxed version shown. All small sized rosins are presented in the usual plastic case but without the cardboard box (rosin shown far left). Both the standard and the small rosins are the same diameter, but the small rosin is about half the height of the standard rosin.

While there isn't a specific rosin produced for double bass now, the cello rosins are highly recommended for use by double bassists.

* Standard Size Andrea rosins are in a case which measures approx 5 cm in diameter and is 2.5 cm tall. The rosin block itself is approx 4 cm in diameter and 1.5 cm tall.

"Thank you for your help, I have purchased a solo violin rosin last Saturday and couldn't be happier! Thanks for making this wonderful rosin available in the UK again.

Provides excellent traction on the strings and makes bowing and sound production virtually effortless

Produces a clean, powerful sound with precision and projection

Produces virtually no dust provided that it's not applied excessively (4 swipes are sufficient)"

Allen Laing - Glasgow
