

Suppliers of your Requirements for Violins, Violas, Cellos and Double Basses

**NEW GEWA IDEA CARBON FIBRE VIOLA CASES**

After a long time of only really being able to offer BAM cases as the ultimate in strong, but lightweight Viola cases, we are pleased that Gewa have now introduced their new Carbon Fibre models, which go beyond the limitations of the BAM cases, and present us with a case which will be available, rather than awaited!. As always with Gewa, you get top quality GERMAN manufacture, with the support that you expect from the worlds major instrument & case supplier. They are made in 3 weight ranges, the 2.6Kg, which is pure carbon fibre, the 2.8 Kg, which is 80% Carbon Fibre, and silver in the weave to reflect sunlight, and the 3.4Kg which is a carbon fibre reinforced resin case and supplied with a music pocket. All of the cases exhibit a very slim style to assist in acceptance by airlines.
